

Fabricated Square Edge Stair Nose and Treads

Stairs deserve the same attention to detail and design as your wood flooring. Poor tread construction and color match can cheapen the look of your high end floors. Our fabricated nosing and treads are made with the exact same material as your floor and guarantees the best match possible. The square edge detail on our treads is consistent with current design trends.

NOTICE: There is a seamless match between your ground flooring and Fabricated Stair Nosing.

Artistry XL Planks

Artistry Hardwood offers the longest average length plank in the industry. In each carton of Artistry Hardwood flooring, at least 80% of the square footage will be represented as full-length planks. Most other products in the industry will use the language "up to" but never specify how many of the long planks are provided in each carton. Longer planks provide greater visual continuity to your space and show the true unique beauty of mother nature.
